

Subject: Avon, CT **MAJOR DNA!*Do NOT adopt!!
Judith (Judy) Hansen
Avon, CT

Judy met with us this week to meet a lab we have for adoption. I asked many questions and she stated her last pet was a Doberman she had to put down 2 years ago because he became very aggressive. I asked if she made any attempts to work with the dog or rehome, surrender, etc and she said she did not as she didn't want anyone to get hurt. I gave her an application and told her a home visit was required as well as a vet reference and 2 personal references.

Friday I reviewed Judy's application. Looking at the previous pets portion she listed pets she had in high school. I told Judy we are looking for most recent pets, not animals from 65 years ago. She started to say, oh geez, let me think and had a lot of hesitation. I said Judy, what was the last animal you had? She said a Doberman 2 years ago. I asked twice, no pets since then? She said no. I asked what animals prior to the Doberman, she she stated 2 German short haired pointers that lived to be 13 and she put down due to old age. I asked several more questions and again she said, can I come get the lab now? I said no, we still need to complete the approval process and I will get back to you.

I called Judy's vet which is CT Veterinary Center in West Hartford, CT, Judy stated she used Dr Hopkins. I asked for Dr Hopkins and he was not available so I spoke with a vet tech. I introduced myself and asked who Judy listed as her most recent pet and the tech said a 10 month old lab named Misty that was euthanized April 2. I said yesterday? She said Yes! I was shocked. I asked why did she euthanize a 10 month old puppy? She said she told the doctor the puppy had diarrhea. I asked if

any treatment was requested for the diarrhea and the tech said no. Judy made an appointment to bring the puppy in and to euthanize her. I said any pets before? And she said a one year old German Shepherd. Euthanized in Nov 2014. No reason listed. I said I took her to Dr. H. Tech to Dr. H. Dr. H. said I am not willing to see this.

Yes to get rid of clarification, he is euthanizing seemingly healthy puppies and adult animals. "I don't want to mislead this. This study is very serious and persistent. I'm searching for another dog."

DO NOT ADOPT TO JUDY
HENSEN PLEASE BEWARE

PLEASE SHARE THIS DNA WITH EVERY RESCUE, SHELTER, BREEDER, EVERYONE! Judy killed 2 animals within a 10 month period and is adamantly looking for her next dog. She is persistent and clearly should not own animals if she is just killing them.

Regards,

Ivona
