

lab boxer mix (bear)

Location **Delaware**
<https://www.genclassifieds.com/x-375332-z>

Lab boxer mix he turned 1 on April 16th.
 I adopted him when he was 7 weeks almost 8 weeks.
 My pitbull and surprisely my cat who has been with us for 4 years just team up and beat him up.
 we have gotten attacked in the process with trying to get the cat away from him.
 He is up to date on shots and has been Mico chipped.
 Still needs to be fixed.
 He is an extremely sweet dog who just wants attention that my other 2 animals just don't let him get.
 He is a huge push over low on the pecking order as they say. He is fine with other animals loves people
 anyone he see's he wants to go and visit with them.
 he listens well he has learned how to sit give both paws and down and roll over and catching treats is his
 favorite.
 I will want to see the home he is going to I just won't hand him over.
 Any questions
