We're a Kansas City band that just moved to Saint Louis; we have some sort of derivative pop music album. I'm posting in places other than the aforementioned cities in case anyone feels like collaborating over the internet (the future is now!) The links to our bandcamp and soundcloud are below. If it's more convenient, you can go to spotify or whatever you prefer. Please feel free to email if you'd like to share your own music or find some common ground.
