Spring is here and I am needing the leaves out of my back yard. This job will require you to have a GAS POWERED BACK PACK BLOWER or TWO - a helper - and a TRUCK. If you work for a landscaper, this is for you. The yard is 1/2 acre and has a large 20x40 pool in center. The leaves will need to blown out of the shrubs and out of the rock beds into piles in the rear of the yard then taken away. The time involved to do this job is about 3 hours.

Thank.
