Seeking an experienced newspaper editor to work remotely.

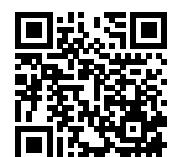

First assignment will be to review several (probably 12-15) 500+ word stories, guest columns, etc. and help give our start-up newspaper a coherent "voice".

Fast moving project so the ideal candidate would need to begin immediately.

Assignment is a "work for hire", complete buyout, we own, use and reuse without limitations in all media your completed edited items. Your byline as editor may be used with your permission, along with your photo and contact information. This could be a six times a year assignment and might result in some additional projects.

Please send a brief overview of your experience, especially newspaper assignment, and a very reasonable fee requirement in first response.
