I have 2 cockatiels with cage and food .I keep their cage open so they can sit on top of cage . I clip their wings so if they glide to the floor they can't fly out by accident . They lovE walking around to stretch their feet .After 10 minutes I put them back on their cage . Pretty girl can be picked up and rub her neck and she loves that . Bunker , you can pick him up on your finger and put him on your shoulder .You can't rub or touch him any where or he will bite .He love his mirrors and rings his bell once in a while . They are good birds and I would like to see them go to a home where they can have this kind of freedom .I'm asking \$75. for everything . But ,I must know for sure they will go to a home like that .They love to sit on your shoulder and will stay there if you don't move fast and startle them .So please , only under these conditions I will let you have them .I can show you how to clip there wings . Serious callers and cash only.
