

Looking to have section of rock wall re

Location **Maine**
<https://www.genclassifieds.com/x-376658-z>

Had a section of rock wall collapse just before winter. Looking to get an idea of what it would cost to have someone re-stack the collapsed section into a small but sturdy series of rock steps up to where wall ends in the photo.

The wall is approximately 6' high and the rocks range from a few pounds to a few hundred pounds. Equipment or multiple people would definitely be needed for the heavier.
