This is a 2 year old M18x R2 Alienware Laptop with minimal Gaming hours put into it. It is a great machine for the right person who is looking for that mobile "Desktop" gaming power in the convenience of a portable machine. I bought it for gaming on the road myself but no longer travel as much and as such have no reason to keep it around.

It has a warranty that will expire in 2016.

I am looking for \$3000 but all reasonable offers will be.
