Hey, I'm an author who's looking for an artist to collaborate with on a series I've just started to write. This isn't for profit, but rather just for fun and for expression. I'm writing a series about a young transgender woman, and her life. Its all fiction. I figured that it would be pretty cool to put some visual representation to the characters I've been working with.

I'm not looking for someone to draw out entire comic panels. Just scenes from the chapters I write. Someone who's preferably on the young side, close my age (which is 19), and who is understanding and supportive of transgender and queer people. For reference of what is one of my biggest influences and what's inspired me, check out <http://iszjaneway.tumblr.com/>, she's pretty awesome.

If this seems interesting and like something you'd like to talk about, don't hesitate to let me.
