This is a post placed by Vermont English Bulldog Rescue. If you do not have an application on file, you will need to request one. There are reference checks. I have two dogs available for adoption (not together)

1. Five year old female, spayed, current on all vaccines and heartworm negative. Good with adults and kids. Ok with some larger dogs but aggressive with small dogs. Would prefer a home with no other pest. Crate trained, house trained, walks perfect on leash and loves to ride in the car. This girl suffered with allergies for a long time that went untreated. She will need to be on a non grain, non poultry diet for life. For the next few months she will benefit from 2-3 times per week baths in Malaseb and most likely will need an oral mediation as well. She is happy, active and has no other known health issues.
2. Five year old female, spayed, current on all vaccines and heartworm negative. Good with everyone, adults, kids, dogs and cats. Would prefer to not place her in an overly loud, busy home. This is a lovely girl who deserves attention. She has a condition very common to EB which is chronic dry eye and will need prescription eye drops 2x a day for life. She will also need artificial tears 2-3 times per day. Otherwise she is in good.
