

Grass Hay Straw

Location **Wyoming**
<https://www.genclassifieds.com/x-377792-z>

Only about 2 tons remaining- small square bales. Bales are made up of grass hay, however, were bleached by the sun before getting baled thus I am selling them as straw. I still feed them to my horses, however, and they don't seem to mind it. Would be perfect for cows, goats, and sheep for feed or even bedding. Bales weigh around 45lbs. Call or text. Located just east of town near the Archer exit. I also have a few west of town on Horse Creek.
