I have some termite damage on an old family house. My house is about 25 mins from downtown and 30 mins from Harbison. I need to spot treat the two damaged areas where there are current termites, and treat the whole house to prevent and kill any others. The house has not been treated in 7 or 8 years. The house is not under a termite bond.

The house is about 2600 sq ft and two stories. I do not want to hire a company, I would rather pay someone cash after hours. Please respond with your:
