

asphalt millings for driveways (murfreesboro tn)

Location **Tennessee**
<https://www.genclassifieds.com/x-377877-z>

Asphalt millings are a very inexpensive alternative to crush and run or rock. The benefits are that this product does not wash away like loose stone and is a green product. If you choose asphalt millings you will not be adding rock every year to your drive and you will not be grading it time after time due to wash out.

Asphalt millings are a form of earth materials produced using asphalt that has been removed from the roads and interstates, and are integral to the recycling process. Once we spread asphalt milling we will begin the compacting of the millings. Small areas are plate compacted, and larger areas are rolled. Once this stage is done, we recommend you have the asphalt millings sealed with an emulsion tack coat. This helps the bonding of the millings and has a life of 5 to 6 years. If you need a new driveway cut, we can do that. If you already have gravel down as a sub base, more than likely we would just need to re-grade drive and apply asphalt millings. The price depends on if you already have gravel or you are doing a new driveway install. Either way you will be blown away at how much cheaper this product is compared to rock and grade work time after time. Give us a call and we will be glad to answer any questions you might have about this product. Estimates are free. . .
