leaking faucet or toilet or show you brochures on replacement fixtures. It will always be your choice. We have no salesmen to pressure you into unneeded work or overpriced parts. No one gets a sales commission for selling you over priced parts. We believe that is just wrong. I want to make you our friend that can call us whenever you need someone to help when bad stuff happens. Try me if you are unhappy with anything let me know. I believe that it is important to make our customers happy. I have semi retired. I once had 7 plumbing vans, 2 trucks and 12 employees. But I got tired of the rat race to make enough to keep that many people working full time so they could take care of their families. I cut the company to 2 vans and 1 truck and now I only try to keep enough work to take care of my family. No more city planning meetings, no more EPA inspectors

(in California EPA is in charge of drains and sewer). My life is much less stressful But I am only semi retired because plumbing is more than a job to me. It is in my blood. My Great Grandfather's plumbing company was BROWN AND SONS PLUMBING founded in 1927. My first plumbing job was working for my Grand uncle Kent King Brown and my Great Grandfather papa Kohler Brown. His company is still being run by 2 of my cousins Larry and Scotty Brown in Woodland Hills California on Ventura blvd. I am a 4th generation plumber. My great Grandfather taught me that making your customer happy was the most important part of the job. He always said we work for our neighbors/friends and we need to take care of them so when you see them in church or at the grocery store they are glad to see you. After I say my prayers at night I sleep well knowing I did my best to make my customers life.
