It increases property value and you plant it only once. Bamboo is a renewable grass that is a relatively cheap to invest in for your family to have later. We grow 15 cold-hearty species in Mo. and we are offering some plants to start your own grove. Call for species list and availability. We have some in pots and will dig up May-August. We can prepare the location for plants. We have green, green with yellow stripe, yellow with green stripe, all yellow, black, all are excellent erosion control to keep your land from getting away from you and bamboo has an endless amount of uses and if you lose your job you can make something to sell or sale plants out of your grove or sell the material and let them make it and you can eat the young shoots that come up in springtime, high in protien and it's good for you. Call Ray at Species and Pricelist For 2014 all 1/2 off but are subject to change without notice .. S. M. L. XL.

all yellow, black, all are excellent erosion control to keep your land from getting away from you and bamboo has an endless amount of uses if you lose your job you can make something to sell or sell plants out of your grove or sell the material and let them make it. Around Anji county in the Zhejiang province - China - hillsides are covered with velvet green Moso, feeding thousands of small and not so small factories producing a huge range of useful products. In Japan, Moso is considered by many as best eating bamboo.

The bamboo plant production is \$200, 000 + a year. All equipment, tools, pots, land, house shop, 1999 chevy 1 ton and much much more the business up and running must sell because of medical reasons. Call Ray for info. Or put the following link in your search box for a detailed description of each bamboo, the price list, and containment instructions, also to see the business for sale.
