Awsome high end HP(Compaq) business 6510b laptop. Original cost was over \$2200 and only used less than a year. It is loaded with such features as Intel Core (TM)2 Duo CPU 2.10GHz, 4GB fast highend Ram, DVD-R, on board data card, Windows 7 Ultimate OS, 15" high resolution screen, and more. Any questions please call this won't last long with all it's features and the price. And yes a \$799 sound like a lot but if you, or someone you know, wants or needs a fast, highend, business grade laptop with the ability to activate the onboard data card(currently AT&T I think) and be able to get on the internet anywhere you go it's a steal!

Images are not of actual item but that is what it looks.
