I am creating a new conceptual group and am looking for a versatile female vocalist to front said group. Think Mike Patton, but female, dressing in Gothic Lolita apparel. Need charisma, stage presence, and as I said, unique versatile voice that covers many ranges and genres.

As for the band itself, it is of a certain theme and aesthetic. If interested, contact me and I will explain more. Also, I can send music samples of other projects I have done if necessary.

Thanks for reading, and looking forward to hearing from.
