I have a vintage and unique 7 drawer desk with a pull out work area to use as a work space, laptop, computer, etc. All drawers are dovetailed and open and close without issues. This desk does have normal finish wear on top as shown in pic, however, it did clean up nicely. The desk has a file drawer on the bottom right side. It is missing a handle on bottom right file drawer, however, there is a handle there, as this drawer had 2 drawer handles. It is 43.5" long, 22" deep, and 31" tall. Asking \$150.
