

75 gallon saltwater tank complete set up 1000

Location **Ohio**
<https://www.genclassifieds.com/x-381256-z>

I am selling a fully complete running and set up 75 gallon saltwater aquarium. It will come with the tank, stand, hood, correct lighting, a protein skimmer, 2 filters, UV sterilizer, heater, and around 80 pounds of live rock. This set up has been up and running for the last 6 months. It is starting to build Coraline algae on the glass. The only reason for selling is we got a puppy that will require more time than what I can give towards the tank. Our loss is your gain well over \$2000 invested. If you are looking to start the hobby this would be the perfect set up for you as it has everything you would need to get going. Tank is still up currently and running. I will help with the tear down. No calls or text after 9 PM four 4 zero 7 nine 9 two 3 four
