Trod Nossel Studios has been recording and mastering music day in, and day out since 1966. In fact, from 1962 to 1965, before the studio became Trod Nossel Studios, it was Syncron Sound Studios, which also manufactured fine microphones. We've recorded from the novice musician, to Fleetwood Mac and R. Kelly. Come record at a studio that has the expertise and proven track record to get your project sounding the way you envision it, from the recording process, to the mastering process.
