I'm looking for someone to help develop a clothing prototype. I've had an idea for a couple of years for an article of clothing that I've wanted and am thinking might be marketable to others. I'm willing to pay for help in making a prototype that at least will be something I can wear/use. Let me know if you're interested and what your experience/expertise in the clothing design and development is, since I admittedly don't have much special experience in this.
