I have been doing licensed child care and Preschool in Colorado for 20 years. I am a mother of three.

We like to do a lot of reading. My preschool program starts at 2 years old, but I also involve the younger children. We do a lot of learning through Montessori activities and play, manipulatives (math), baking (science), music and movement (dance and singing), finger puppets, puzzles, and dramatic play. Learning doesn't have to be boring or tedious.

The children learn the basics needed for kindergarden, plus a lot more. I do a different theme for each week of the year, all year. Children don't stop learning during the summer. I have a fine arts degree and enjoy instilling children with a love of the arts. We do a lot of arts and crafts. During the summer we do 2 or 3 swimming sessions.

Children learn through sight, touch, and sound, so we go on field trips too. Exploring the world around you is an amazing way to absorb knowledge. I have memberships at the Denver Nature & Science Museum, World of Wonder (WOW) Museum, Denver Botanical Gardens, Zoo, Butterfly Pavilian, and the Colorado Railroad Museum. We also go to Berry Patch Farms (an organic you-pick-it farm), and lots of parks with playgrounds.

I feed the children breakfast, lunch, plus morning and afternoon snacks. I cook their food from scratch. We drink milk without hormones. I don't give the children foods with artificial dyes.
