Though I swear this is the best one! I'm a music producer, guitarist, and pianist looking to work with a female vocalist that is interested in some great opportunities. This involves recording albums, getting song placement on TV/Commercials, and filming advertisement spots for a big audio company. Any commitment level is fine. We could just record some songs and collect royalties or you can take advantage of all of the mentioned opportunities above.

Any style is fine and professional experience isn't really necessary. I'm not looking for anything in particular as long as it's someone who enjoys working on music and would like to possibly make something big out of this opportunity. I'm incredibly easy to work with and believe in a 'no pressure' environment to attain the best results.

Enough of this rambling...contact me if this ad piques your interest and we can grab a tea (so eclectic, I know) and chat!
