I am looking for a graphic designer for a quick and easy project for an emerging eCommerce company.

I would like the project to be completed ASAP (by May 1)

I have a preliminary sketch for you to work from but I am open to suggestions as well.

Must be willing to make edits if/as needed.
Must be proficient in English.

Please include two of your graphic design creations when responding!

P.S. This gig could turn into more if this project is stellar!
