

LOST white love dove (moilili mccully)

Location **Hawaii**
<https://www.genclassifieds.com/x-383959-z>

Just came home (7pm april 22nd)and realized my pet "love dove" is not in the house. His name is DUB. he is only about 5 months old.he is sweet and spoiled.he is young and is a companion for my other bird .he has not been trained yet to be handled. Still a bit skittish But I do believe if I found him I could encourage him home with his friend (my other bird) . He gets along with my dog and cats so it worries me a great deal.He looks like any other bird outside that's completely white. So it's going to be hard to find but he is spoiled at home and knows nothing of the outside world.so I'm sure he will seek out human for food soon. He isn't the "smartest " bird either so I figure he won't make it long outside. Cats cars dogs . If you think you've spotted him please don't hesitate to call or text. With location. I live around Moilili / Mccully fire station area ...university/ kapiolani.he is loved and missed a great.
