Paid over \$1,499

Selling for one reason and that is because I am moving. I am taking a major loss. New, less than one hour of playtime on this instrument. Has been stored in a room that has a (Humidifier) and it also has one purchased that is always kept on board with the guitar. Of course the strings have been turned all the way down for storage and this guitar has never seen any elements and has been stored at room temperature since the day it was purchased. It literally is a awesome guitar and will make a great buy for someone, I have already taken a loss and I will negotiate only after you have seen the guitar and I see that you are genuinely interested in it.

Martin acoustic electric model # GPCPA4
 Black Hardshell case-lockable, dark green liner.

It has a onboard guitar tuner, with all Fishman electronic EQ on board with the latest and greatest system. It has literally been played less than one hour and I can give you a good explanation why. It does not have a scratch on it, I repeat it does not have a scratch on the guitar or a single flaw including the case. The guitar is had all of the adjustments and maintenance done to it and this was done at the time of purchase. If you waste your money on another guitar you will literally be doing just that, wasting your money.

Google the model number that I have provided and you will see precisely what the guitar cost and

about it. Every guitar advertised is for sale. No more!

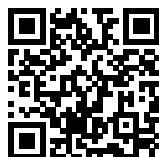

This guitar is a professional guitar with the cut out as you can see and will last a lifetime and would make a great gift from either a beginner standpoint or a professional who travels on the road.

This guitar gets 5 STARS on most sites!

Lastly, if you leave your telephone number I can respond to you almost immediately depending on my schedule that day. I generally don't text and would rather speak on the phone then go back-and-forth and
