If you watch shows like Judge Judy you'll notice over half the litigants are on disablity yet many are obviously not disabled and many are still working under the table jobs doing physical labor. When the Judge asks what their disability is, some people are not exactly sure. Whatever the douche-bag lawyer came up with basically. Then when they go to a commercial, there's another douche-bag lawyer saying he can get you disability for just about anything physical or mental. I hear some of these disability lawyers actually have a menu where you can choose a disability. Many Americans have gone on disability because they can no longer find work due to the collaspe of the economy back in 2008 and the weak job market that never really recovered no matter what Prez Obama claims.

The disability lawyers don't care if you are really disabled. They just want their fee (usually around \$3,000 that's deducted from the first disability settelment payment). Most American's figure, hey since most of the jobs are gone why not go on disability. The reason the lawyers get away with so much fraud is because their cartels make hefty contributions to the polilitcians and because our politicians are ALL so goddamn greedy and corrupt they are happy to help out the lawyers eventhough it costs the taxpayer hundreds of billions each year in phony claims.

What really makes me sick is these parents who receive disability payments because their kids are getting poor grades in school. Many get around \$1000 a month per child for bullshit like ADD. Most kids have that, I know I did. These kids daydream, goof off and don't want to learn so their parents are rewarded. This is Goddamn insane.
