

Dubia Roaches (Sale) (Sale) Bearded Dragon food. (Farmington Mn)

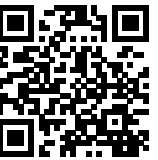

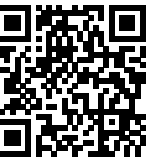

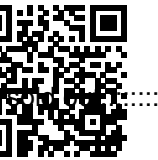

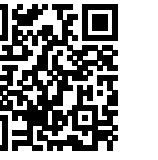

Location **Minnesota**
<https://www.genclassifieds.com/x-384333-z>

Hi.

If you have been looking to change to a different type of feeder for your Bearded Dragon, Turtle, Water Dragon or Gecko's and any other insect or bug eating animal. You may not want to pass on this offer. You will not be disappointed in the quality of them. I have been breeding them over the past 5 years and sold 1000's of them to the Twin Cities and surrounding areas without one complaint. I feed my Adult, Juvenile and Baby Beardies these and they love them. They are a lot more nutritious for your pet and you don't have to feed them as many to fill their tummies. Crickets die fast and smell when they start to die off and do not have anywhere near the same protein values as Dubia Roaches. These Roaches also live for several months and even years when taken care of properly unlike crickets that die off in several days. Care for them is as simple and easy as crickets and you will get more bang for your buck. If you have any questions please feel free to ask. I can also overnight ship your order for an additional \$10. Saves you time and gas money and they are delivered to your front door. Just give me a Call, Text, or e-mail me at and I can help get you set up and your pet will love you for it. Thanks Tracey

.....Winter temps have arrived. Over night shipping is now \$15. This covers the heat packs and insulated box.

Large orders are welcome.
