

LOST FEMALE BLACK LAB (old metairie)

Location **Louisiana**
<https://www.genclassifieds.com/x-396633-z>

UPDATE: A woman called who saw a black lab who was hit by a car on Atherton and Elshor but still sitting upright in her neighbor's driveway. She thought it was her neighbor's dog and went inside to call her but when she came back out the dog was gone. We are not sure if this is Lola or not but if you live near the area PLEASE keep an eye out for her, she may be hurt and hiding somewhere.

Our dog Lola got out yesterday midday during the storm. She is a small female black lab, spayed, microchipped with a white spot on her front paw. Was last seen on Atherton near the RR tracks wearing her brown leather collar with our contact information, however we think the collar may have come off. She is very friendly and will come if you call her name, but is afraid of thunderstorms. Please contact us if you see her or have her or bring her to Metairie Small Animal Hospital where they can scan for her.
