DON'T REPLACE IT ---- REGLAZE IT!!!!

XTREME TUB REGLAZERS

ABOUT REGLAZING

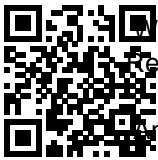

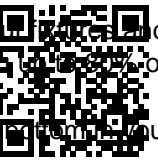

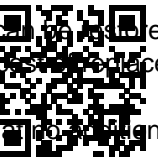

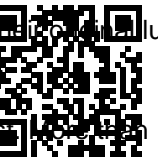

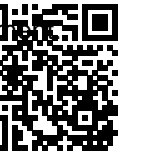

Reglazing is the process by which porcelain and ceramic fixtures and surfaces are refinished to look like new. With reglazing your worn out bathtubs and tile can be restored to their original luster right in place - in just a few hours - at a fraction of replacement cost.

Over the years, thanks mainly to the use of harsh abrasive cleaners, your bathtub has probably lost its original look. Or maybe, your tub has been the victim of someone who has dropped a heavy object and chipped or damaged the surface.

Reglazing can correct these problems. There is no dangerous chemical residue or mess in your home.

REGLAZING VS. REPLACEMENT

With traditional replacement, the biggest problems are involved with taking out the old bathtub. In the process parts of the bathroom tile, walls and floor must be torn away and sometimes the old plumbing is in the wrong place to fit the new bathtub - more time and expense.
