help with Adobe Premier Pro CS6 (United States)

Location **Oklahoma**
https://www.genclassifieds.com/x-398764-z

I'm shooting videos for myYouTube channel and I just need someone to show me how to use Adobe Premier Pro CS6 to:
* synchronize video files (for example: say you have two camera angles and you want to switch back and forth for the video)
* also synchronize an audio file (I'll record the audio separately using a lavalier mic and will need to synchronize it with the other two video files).
* create an "intro" for my YouTube channel
