Here is your opportunity. I am selling a econoline or e350 / e-250 rear end . I was told it was a dana 60 and great for your jeep conversion needs. It appears to be in good shape on the outside with brand new brakes. Comes with everything in picture. My neighbor says it was removed because it had a issue. So i am selling it as a core due to not knowing if it needs a simple repair or just installed in your application. The numbers i found on the identification are 55 2024GB 606845. Selling for \$ 125  
 Obo may deliver if you live close by . My number is Matt
