I have some guitar pedals for sale. They are as follows:

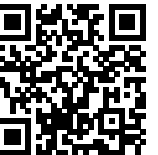

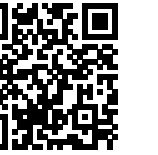

Steve Vai Jemini Overdrive/Distortion: 150. Rare pedal. Also super cool on looks! These were only made for a short time. Not sure why, cause these sound amazing. The overdrive side is very full sounding, like a TS 808, but more bottom and gain on tap. The distortion side is like a modified DS-1, but not harsh or brittle whatsoever. Easy to find a sweet spot.

BBE Blacksmith Distortion: 40. Cool distortion pedal. Same gain structure as a metal zone, but not buzzy sounding. Very versatile eq section.

Mooer Hustle Drive: 50. This pedal is the real deal. Made to sound like the Fulltone OCD pedal. Incredibly amp like overdrive all the way up to distortion. Huge sounding but never muddy. This pedal legitimately sounds like an amp.

Line 6 POD 2.0 with Footswitch: 100. This pod does everything from fender cleans, marshall crunch all the way to mesa distortion, and even has built in effects. Reverb, delay, chorus and many more! Great for recording. Also, the included footswitch even makes it practical for live use. Very cool unit.

There is nothing wrong with any of these pedals. I just have to clear out some gear, and these are some of the things that have to go. I would prefer cash, but will trade for a nice strat. Just let me know what you have. All these pedals are prices pretty fairly. If you are interested, please text or call Thanks for
