Have you worked your way through the lower courts of Palmer or Anchorage because of one or both of these CS related reasons below? There is still hope if CSSD has justified your paying for your kids expenses twice over.... Meaning , did your X try using the system as a weapon against you when they didn't have the kid and they white washed it calling it child support instead of alimony? Many times our civil rights to be given notice of court actions are ignored, this being used as a tactic. There are lots of people in deep doo doo for not paying for their kids expenses twice over as ordered. There is strength in numbers. Let's Skype and turn those lemons into lemonade. We can build a civil rights case together to reform the system.

Reason number 1> If you too were not notified or aware that you had been given through the Palmer or Anchorage courts actions any CSSD obligation [= arrearage accumulating] it ordering you to pay child support for a child that was already under your care and expenses at the time, [not with the parent who was suppose to have received the child support regardless of having had no child expenses = because you were already paying the child's expenses in your care during that period of time] and CSSD, the courts and your X conspired to try to make you pay twice over, let us also co-operate too to turn it around.

number 2> If you had not been given any notice you owed an arrearage... or given less than 12 mos. time to pay it off once you figured it out and CSSD unannounced to you seized money from your bank accounts or used other coercive collection measures taking away your tax returns, drv. lisc. or property, or freedom by putting you in debtors jail for the arrears you did not know about or because of awards of

CS given in retrospect... If you, months or years later, found out you unjustly owed CS in retrospect that you can't self undo, it's a huge mess that can be avoided by having a lawyer for the

... We can build a civil rights case together to reform the system. We can build a lawyer to take contingency basis to start a Federal Civil Rights Suit which would include your X that conspired with CSSD to use our children to work the system to their advantage instead of for our kids advantage like they claim we can reform their self serving definition of what is in "the Child's Best Interest" No deadbeat moms or dads need apply... only loving parents who spend time with their biggest blessings. If they want to put you in debtors jail for not paying twice for their upkeep, then doing this can keep you out and about until the case is.
