

Seeking WordPress Expert (Delaware)

Location **Delaware** https://www.genclassifieds.com/x-400626-z

I am seeking someone to create a simple website for a small start up business. I'm an individual hoping to make marketing my business and revise my existing website to look more professional. I have written all of the content and already have a logo. I would like an experienced personal who has already used WordPress and is familiar with it to transfer the content into a website I select and upload my logo. I expect to have 1 or 2 revisions after a draft is made until final approval.

I DON'T need a domain, website hosting, or email accounts. I have all of this. I only need a website built. So if you are a company offering me these services, I'm not interested.

If you meet these qualifications, please provided:

- 1) A short summary of her qualifications or a resume (preferably)
- 2) Links or samples of websites you have solely created; these MUST include Wordpress websites
- 3) Must include the cost a fixed cost / flat fee to do the work; I will not pay someone hourly
- 4) If you meet the qualifications, I will expect one or two professional references for which you have provided similar services.
- * Anyone responding to this Ad asking if Job is still available will not be responded to.
- * Only serious inquiries, and only those that reply with the 4 items listed above will be considered. SOLICITORS NOT
