Heres the deal. I bought a cheap 5-string banjo off ebay and took lessons hoping to learn to play bluegrass but it turns out that it is an extremely difficult instrument to play. I got distressed and gave up. Now i am ready to start practicing again. But I want to know what it will sound like hearing someone play a song or two on the banjo i purchased just to hear how good it will sound if i can ever get good at it. The douche bag i took lessons from refused to play even a single song on it! I would like to record you playing it so i can watch it from time to time for encouragement when i feel like giving up. Can you help me?
