

1966 AMC MARLIN FAST BACK COUPE V8 327 automatic clean (12900. USD)

Location **Maine**
<https://www.genclassifieds.com/x-401901-z>

This marlin was based on the intermediate rambler chassis styled as a huge fastback. This amc is a 1966 amc marlin fastback coupe with a V8 327 automatic has 250 horsepower from the factory. The interior in the car is all original and in great shape, all the factory options still work heat, clock, tachometer. They only produced 4547 marlins. The marlin was created to compete with the ford mustangs and the plymouth barracudas but was built on the 112" wheel base rambler classic chassis placing it in the midsize class. The marlin was the first fastback in the segment and it was offered with a variety of engines, this car came with the V8 327 CI automatic and has thrush wheels on it. I want \$12,900. for the car or maybe consider a trade for a muscle car like a camaro, gto, chevelle, or even a newer sports car please no junk this is a beautiful car. I CAN EMAIL
