EXCELLENT CONDITION! Circa 1950s General Electric Combination refrigerator/freezer in ivory, model LH-121. Full sized! The freezer section with Ice Cream compartment on the door and a juice holders. There is one shelf to the interior for ice trays or whatever you desire. The refrigeration with a "meat drawer" and lazy susan twirling shelves that work perfectly. Beautiful handle and four aluminum shelves, two Vegetables drawers with and push-in "Butter" compartment to the door. This was owned by my grandmother...one owner...perfect condition and runs great! We have kept it properly stored in a climate controlled environment and the doors left properly cracked for ventilation.

This is a very sentimental fridge for me and I want to find it a great home. I will accept your best cash offer.
