I take great pride in showcasing my style, and creativity through my photography. My goal is to capture the unique personality of every individual I photograph. I want everyones experience with me to be laid back, and fun. I will provide a comfortable environment for your session, that way you look natural in your photos. I try to have my photos not be to rehearsed and posed. So to not have a stressful photo session, I

---

---

provide little props, and a basket of fun stuff (for all ages) with all of my sessions to have fun, and stress free photos that everyones personality shines through. You will love your photos from me! :)

2015 Wedding Dates Are Almost Full, Limited Availability!!! Currently Booking for 2016 Weddings!! :)

Wedding Photography, New Born, Infant, Children, Family, Senior Session, Photographer, Maternity, Trash the Dress, Boudoir, Free Engagement Session

Full Charge Bookkeeping Services including Payroll - QuickBooks Mac, PC, and Online If you are backed up on keeping your books - 6 months, 1 year, 2 years etc. I will get you updated Off-site, and subsequently keep your books updated on a once monthly basis. I can also work On-site on a once monthly basis to reconcile and keep your books updated after the initial backed up bookkeeping are updated and reconciled. I charge a flat rate for backed up bookkeeping update and reconciliation, with an option of flat or per hour rate for monthly bookkeeping. I service small to mid-size businesses in all industries including architecture, designer, photography, real estate, construction, daycare, restaurant, jewelry, medical, and legal. I can also get your personal information setup in QuickBooks in order to file your taxes come year-end, and also to keep a tab on your expenses and be better able to budget.

Summary of Services Offered: QuickBooks Set Up & Consulting I set up your company in QuickBooks by creating the Chart of Accounts specific for your business type, and upload your customers, employees, and vendors to QuickBooks from an excel sheet if you have them there, or set them up individually. I also setup stocks, bonds, dividends, interests, and other investments accounts into QuickBooks.

QuickBooks Training is also available for you or your assigned staff member. Backlog Accounts Updating If you are a little or a lot backed up on your bookkeeping, I can get your books updated in a shorter period of time Off-site than would be possible On-site. Following our telephone discussion, after cost agreement, I will email a list of documents and information that will be needed in order to get your accounts updated. Upon our initial meeting, you will hand me the requested information and documents, that I will take with me to update your files and later return to you with a copy of your updated QuickBooks file.

QuickBooks Consultation If you have been keeping your books and somehow figure out something is amiss but not quite sure what or how to fix it, or just want to ensure you are entering your information correctly, contact me for a consultation.

Invoicing - Accounts Receivable I create invoices and sales receipts for all your customers, and apply their payments when received. I can also email their invoices to them via your company's email, an also send periodic reminders or customers' statements for any unpaid invoices. If you do not own QuickBooks and would like to submit professional looking invoices to your customers, I will create and email your invoices to your customers via your company's email address. I will subsequently apply the payments your customers made to their invoices, and allow you to have accurate receivable reports.

Billing - Accounts Payable If you have accounts with multiple creditors and do a lot of billing, I can help you keep track of their due dates in order to avoid late fees. I will enter the bills in QuickBooks citing their due dates, and inform you when they are due, and subsequently write the checks

---

and bills as paid in QuickBooks. Bank & Credit Card Reconciliations I reconcile all bank and credit card accounts with QuickBooks to ensure accuracy. Reconciliation is a huge part of bookkeeping and the only way to ensure the bank has the correct information as well as your records in QuickBooks. Financial Statements Setting up the Chart of Accounts correctly and inputting accurate information is the only way to ensure the financial statements generated such as the Income or Profit & Loss Statement, Trial Balance, and Balance Sheet, are accurate. These reports will be required by your Accountant periodically and most certainly at year-end to process your tax returns. Customized Reports There are many reports that can be generated periodically to give you insight as to the well-being of your company. There are also customer and vendor based reports that can help you keep track of your stance with them, as well as inventory items you need to re-order. I will email you customized reports as needed. Payroll & 1099 Contractors Setup I setup your employees information in QuickBooks and generate weekly, monthly, or bi-monthly payroll for your employees. I offer direct deposit option, or in person option where I take your printed paychecks to you on a day you require. If you already have a payroll company I will work with them to get payroll information entered into QuickBooks. For 1099 vendors, I will get them setup in QuickBooks so that their 1099 forms can be generated at the appropriate time. Quarterly & Year-End Payroll Taxes & Sales Taxes I will prepare and file your 940, 941, NYS-45 and other related tax forms prior to their due dates in order to avoid penalties and late fees. I will also prepare and file your sales taxes in a timely fashion. Items & Inventory Setup If you are product based, I will setup your items and enter your inventory quantities so that you can keep track of each inventory item and know when to re-order. Call Marie @ to discuss further and schedule an appointment to get started. I will be happy to provide you with references as I have been successfully doing this for over 17 years. Marie Bookkeeping & Data Entry Services Not just Data Entry but knowing where to enter Data!
