

One stop Air Cooled Volkswagen shop (DenverAurora)

Location Colorado https://www.genclassifieds.com/x-403911-z

Does your Air Cooled Volkswagen need a tune up? Or does it have some rust that needs repaired or metal replaced? With over 40 years experience I can get your Air cooled VW running and looking great. From complete engine build/rebuild to complete off pan restoration. Rust and Metal repair, Engine build/rebuild, tune up. I have a small shop with low overhead and can keep prices reasonable. We do custom Metal fabrication and Welding. So if you need Welding/Rust repair or Custom body modification give us a call. We do Engines from Mild to Wild. But if you want to get your Volkswagen running or running better we can also do that.

Thanks Maddy
