I have a Manuel 07 mustang gt with only 57000 miles on it. Aftermarket parts include Flowmaster exhaust system, new Pirelli tires, interior and grill led lights, smoked headlight, taillights and foglights, push button start and a Ford racing cold air intake. I'm the second owner and it has been taken care of very well. The only reason im selling it is to buy a diesel truck. 17000k obo call or text for more pics 60five 787
