

Electrician needed (Midlothian)

Location **Texas**
<https://www.genclassifieds.com/x-437040-z>

I need an electrician to run a line and install an outdoor outlet for my above ground pool pump. I will post a picture of what I would like it to look like.

I don't care if you are a certified electrician or not BUT I would like to have it done correctly so it doesn't trip a breaker or short out.

The distance from the pump to the breaker panel is roughly 65 feet. There is an existing GFCI 2 plug outlet on our patio about 40 feet from the pump.

I will buy the material, if you need me to, once you provide me a list of what you will need.

Please email me your total price for labor.

I need this done ASAP. Thank.
