

Standard poodle puppies (special needs)

Location **Michigan**
<https://www.genclassifieds.com/x-438406-z>

We have 3 standard poodle puppies that we are looking to rehome for a small fee each. they are approximately 12 weeks old, black, 2 female and 1 male. They have a condition called lymphedema, which causes swelling in legs, feet, and sometimes the ears. They will only go to homes of very responsible parents. Other than this condition, they act and look like perfectly normal poodles . Parents are approximately 40-45 lbs full grown. Please, many people have responded, and after numerous msgs back and forth, they have not given me a contact number to make arrangements. If you are not serious or can not afford a special needs puppy, do not reply.. I will do small background checks before releasing a puppy to anyone. Thanks for your.
