## Our Mission

Our goal is to offer a developmentally appropriate program to meet every child's needs by nurturing the whole child. We also support all families in our program by providing open communication, long lasting relationships, and trust.

We offer a high quality environment that has the warmth and caring as an extension of each child's own home. We strive to make our program the best we can offer.

We achieve these goals through professional development, accreditation programs and parental input.

We follow the quality standards of NAFCC and honor the NAEYC code of ethical conduct.
