

Manx kittens (Pass Christian)

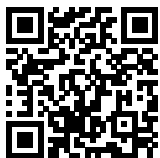

Location **Mississippi**
<https://www.genclassifieds.com/x-438982-z>

Both female, Both loving and sweet, litter trained and eating well...Striped baby is 6 weeks and is mostly weened off of Mama, so she is eating dry food and everyday I give her a meal of dry food soaked in evaporated milk with a little water... Russian Blue baby is 9 weeks old and eats dry food with a meal of either raw or cooked chicken or hamburger daily...The Mama cat is fed dry available, but several meals a day of raw or cooked meat...Mama cat is nursing less because the babies are now biting her, so it's time for babies to find new LOVING homes... Manx cats are awesome pets...Their back legs are longer and it gives them a really cute kind of 'bunny hop' to their gate...They're smart and kind of dog like in their loyalty to their human...They are more trainable and can learn tricks easily with kindness and patience...If allowed outside (these have not been outdoors) they are talented hunters..These darling babies are used to other cats and tolerate my big dog...lol....But with a patient and loving introduction, these babies will get along with other animals....

Rehoming fee applies to approved homes only...

These babies have been raised in a very cat friendly, loving, quiet, adult home with no children, so I can not guarantee they will get along with very young children, that are very busy.....Adult supervision should be exercised with any animal and youngsters
 two two 8 - three 6 three - nine 0 five
