

# Digitech Metal Master Distortion Pedal (45., USD)

Location **Missouri**  
<https://www.genclassifieds.com/x-439052-z>

I am selling a Digitech X-Series Metal Master distortion pedal that is basically new in box. It was used once or twice in my smoke free home and has never been gigged. You are getting a pedal that's just like new at about half the typical new price.

This pedal delivers DigiTech's exclusive multi-distortion technology, offering users seemingly endless distortion types that can be morphed into a variety of combinations. It can be powered by a standard negative tip 9 volt power supply or 9 volt battery.

The Metal Master features these controls:

- Level
- Low
- Hi
- Morph

If you are seeing this ad the item is still available. I am firm on my price and not interested in trades. Thanks for.
