We can repair all types of problems with PS4 and PS3 systems.

Call text or email with any questions.

All repairs are done by an electronic technician who has been in the business for many years.

All parts used are original and genuine OEM parts.

In cases of PS4 flashing light Blue Light of Death BLOD & White Light of Death WLOD our repairs are permanent repairs because we reball the chips ( APU ) with a higher quality, leaded solder. This ensures that the solder joints don't break under heat and stress. We use industry standard reball / reflow / rework machines to perform repairs (no heat gun / hair dryer / cheap homemade fixes here ).
