

# 1987 Mercury Cougar 20th Anniversary Edition

Never used 20th Anniversary floor mats included.  
Clean Car Fax comes with it.

New battery, starter, alternator, plugs, wires, transmission service, radiator flush. New custom Magnaflow dual exhaust system installed.

The bad:

- Tires should be replaced. They are in great shape, pretty much brand new other than they are just old. 1st owner put them on right before she stopped driving the car back in the early 2000's.

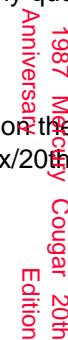

-AC does not work, the compressor is good, possibly leak in the hoses. I tried to recharge it, it got cold

but then went away which leads me to believe everything works there is just a good leak in the hoses.

Radio Shack's Equalizer will not play on for the two multi-radio systems.  
 • Could use a headliner liner. Headliner is not bad but has traces from retailer. Would be clean it.  
 • Small surface rust spots on open lower rear wheel panels (see photos).

Email/call/text me with any questions and how to reach you if you are interested.
