Car has 142k miles motor, trans and suspension, paint work all have 2700 miles. Intended to put a turbo on the car but, I lost interest in it. I have an intercooler, wastegate and piping that come with it. All you need is hot side, turbo and fuel. This setup can handle 1000+rwHP no corners cut. I have pictures of the entire build everything was cleaned engine bay was completely stripped and repainted. Text 40h5 40ne5 5500 for any questions. 15k obo
