Hello! I am a pro musician and I also transcribe music as a side job. I use Sibelius (a computer program) to do my work, so the charts you get will look nice and be easy to read. It is a great investment to have nice charts for your band. Rehearsals and recording sessions will go WAY faster! Besides that, you will seem more professional and it's just nice to have charts for your music. I can even make charts for a whole album if you want :)

I offer 3 types of charts.

One simple one with only chords. A nice chord chart. I charge \$20 for my time in transcribing it and then creating the chart in the program.

Chord chart with specific rhythms and notes for the band for \$25.

Also a detailed lead sheet. Chords, all the necessary rhythms, notes and specific melodies or parts for each instrument. This is one chart that will work for the whole band. Maybe 2 clefs if needed. For this I charge \$40 because these can take some time to create.

You can see 3 examples in the images. One example for each explanation above. If you want more than 3 charts I will give you 5% off. If you want 10 charts I will give you 10% off.
